IMPORTANT NOTES:

All frame height dimensions are to the top of the frame using 270mm rails.

For illustration purposes different configurations have been used. Variations will occur due to tare weight differences caused by optional equipment and fuel. Variations of +/- 25mm can be expected on heavy duty trucks.

Heights have been calculated with the tyre in an unladen condition and unless specified, Bridgestone tyres have been used in the calculations, variations will be caused by different tyre manufacturers.
