

THE DAF XF
PURE EXCELLENCE

XF

DAF

The benchmark for transport efficiency

The DAF XF sets the benchmark for transport efficiency.

It has all the benefits you expect, like excellent fuel efficiency, safety, driver comfort and exterior design features. In short, the DAF XF is **PURE EXCELLENCE**.

Driveline Excellence delivering Fuel Efficiency

The DAF XF delivers exceptional fuel economy. Higher torque at lower revs in combination with optimised drivelines, high-efficiency rear axles, enhanced electronics performance and aerodynamic improvements result in increased fuel efficiency.

Safety

Safety isn't just one more thing to think about, it's everything. The DAF XF delivers passive and active systems that elevate safety standards for drivers and other road users.

Outstanding Driver Comfort and Interior Design

The high levels of driver comfort are another enhancement of the DAF XF. The flagship XF has many features that make it an even more comfortable place to work, live and sleep.

Exterior Design Evolution

Great design is a hallmark of DAF. The premium exterior styling makes the DAF XF stand out on the road and its design features contribute to excellent aerodynamics to enhance your transport efficiency.

Driveline excellence

Great fuel efficiency starts with the engine. The DAF XF is powered by the multi-torque PACCAR MX-13 engine with an extra powerful 530 hp/390 kW rating. Many innovations result in even more torque at lower revs for better fuel efficiency.

Engine Innovations

Achieving extra fuel efficiency, lower CO2 emissions and excellent performance starts with having the right engine and driveline for the job. The DAF XF multi-torque MX-13 engine, as well as valuable innovations, including highly efficient combustion and air management systems. Smart oil, steering and water pumps deliver output matched to the exact demand of the engine in every situation.

Eco Mode

To boost fuel efficiency, reduce emissions and lower operating costs, the DAF XF includes Eco Mode functionality. Eco Mode supports the driver with gear change parameters to provide optimal fuel economy and is standard on all vehicles with a manual or TraXon gearbox.

High-Performance Gearboxes

The latest generation TraXon automated 16 speed gearbox is standard on the DAF XF. Less friction losses, and faster upshifts contribute to low fuel consumption. Driver comfort is also improved thanks to its quiet and smooth operation and precise clutch actuation. TraXon automated transmissions also provide a wider ratio spread enabling faster drivelines without sacrificing startability or gradeability.

High-Efficiency Rear Axles

In addition to improved engines and gearboxes, the DAF XF has high-efficiency rear axles with low-friction wheel ends. Faster ratios enable even lower engine revs for fuel efficiency. To reduce friction losses, grinded differential gear sets and revised bearings and seals in the rear axle along with low-level, low-friction rear axle oil are used.

Strong, Light and Superb Handling

Pure Excellence is also carried through in the DAF XF's chassis. Manufactured from high-quality steel, it's both strong and light and its superior design offers unmatched flexibility with configurations. Components can be positioned to optimally meet your specific requirements.

Battery Energy Monitoring

Battery Energy Monitoring allows the driver to check the status of the batteries and provides warnings when energy levels are critical. It also prevents overcharging. The result is increased uptime due to longer battery life, and reduced operating costs.

Excellent safety and comfort

The DAF XF comes with enhanced features that ensure the highest possible safety of the driver and other road users.

1. **Adaptive Cruise Control (ACC)** automatically adjusts the truck's speed to maintain a safe distance from the vehicle ahead.
2. **Forward Collision Warning (FCW)** generates a warning sound and a visual alert on the instrument panel, urging the driver to take action in order to prevent a collision.
3. **Advanced Emergency Braking System (AEBS-3)** intervenes to slow the truck down in an emergency.
4. **Lane Departure Warning System (LDWS)** warns the driver if the vehicle begins to move out of the lane owing to driver error, drowsiness or distraction.
5. **Vehicle Stability Control (VSC)** the electronic braking system features improved VSC to prevent jack-knifing and overturning.
6. **Protective Cab Suspension and Construction** the energy-absorbing cab suspension and reinforced cab structure has pre-programmed front and rear crumple zones to provide industry-leading vehicle safety and passenger protection.
7. **Side Camera** on the cab provide additional visibility for the driver.
8. **LED Lighting** an improved lighting technology, LED lighting offers better light output offering greater visibility of the road for the driver and of the truck for other road users.
9. **Cornering Lights** designed to provide extra illumination in the direction of a driver's intended turn or lane change.
10. **Reduced Interior Noise** with an extremely quiet interior cabin the driver is not fatigued by engine noise.
11. **Driver Configurable Switches** can be adapted to suit individual preferences and applications, allowing the driver to customise the layout to suit their needs.
12. **Greater Visibility** improved mirror position means mirrors have been placed further to the back in order to create more space between the A-pillar and the mirrors, reducing the blind spot to a minimum.

Superb exterior styling and design

Exterior styling design includes a range of aesthetic developments as well as a number of enhancements that improve the truck's aerodynamics for greater efficiency.

The standard for driver comfort and interior design

The DAF XF builds on the excellent standards of driver comfort for which the DAF flagship truck is renowned worldwide. It offers a premium, attractive look and feel, which includes a large cab interior and bunk area.

High-Comfort Climate Control

The highly efficient climate control unit stands out in comfort and user-friendliness. It features one-touch defrosting, park ventilation, park heating with timer, rest heat and automatic air recirculation and can also be operated using the rear wall control unit. All of which adds up to maximum driver comfort.

Custom Interior Lighting

The interior lighting has an innovative rotary switch that features three modes. The control button is centrally located in the middle of the dashboard console so it is within easy reach. The driver can select different lighting modes for various driving and resting conditions, and there's also a dimming function. For convenience, there's a toggle switch on the rear wall.

Attractive Interior

Warm and sophisticated sand colours for dashboard, seats, curtains, mattresses and side and back walls give the interior a great appearance in which every driver feels comfortable.

Better Driver Information

The DAF XF driver display promotes efficiency. The clear instrument panel fonts and styling enhances clarity. The Driver Information Panel (DIP) provides information to increase driver comfort and efficiency. To enhance driver performance further, settings are grouped on the instrument panel logically and the Driver Performance Assistant (DPA) includes tips for economical driving.

High-End Trim

The dashboard comes in Dark Sand trim with Piano Black deco panels as standard. The deco panels also come in the colours Rustica (dark wood) and Argenta (silver). It all adds up to a stylish, modern look.

Driver Configurable Switches

Thanks to smart electronics, the positioning of switches can be adapted to individual applications and preferences. This adds to great driver comfort as well as maximum vehicle efficiency.

New Sun Visor

The sun visor has a sleek design to optimise aerodynamics and enhance fuel efficiency. It also includes a stylish aluminium-look element for great exterior appeal.

Rounded Shape

The DAF XF has a rounded shape with larger radii on the corners, without compromising comfort in the cabin.

Upper Panel and DAF Logo

The panel above the grille has been enlarged with the DAF logo which is centred to provide a bold exterior.

New Air Deflector Kits

Air deflector kits reduce drag.

LED Headlights

LED headlights complement the exterior design.

Great Welcome

A stylish DAF-logo in the doorstep welcomes the driver to the luxurious cab.

Lower Bumper Insert

For a high-end look, the lower bumper has an aluminium-look accent.

Grille Mesh

Grille mesh gives the DAF XF a strong, appealing and modern look.

Cab Closures

Cab split closures channel the air into the radiator and improve the airflow.
